Outdoor Sportsman's Guide TODAY'S ASSIGNMENT FOR-

By BUDDY MARCEAU
This is the day! A quick survey around Western and Central Massachusetts shows that there the north road without registers the north road without registers. Massachusetts shows that there the north road without registeris an increase in the number of fishing licenses held over last Each member has the right, and year. This means that, even with the protect his own fishing privilent flavorable water conditions, he protect his own fishing privilence for another year, should stop banks of their favorite stream, river or pond for the opening of the fishing season. It's legal to this sport from activities and if the fishing season it's legal to this sport from activities and if the fish for everything but bass, is the sincere hope of the Board There is no limit on the length for trout, but the numbers per day still remain at nine and 12. Quabbin Reservoir is not open.

Our Otis Sportsman's Club re-porter, Clarence M. Priest, in-forms us that the Farmington River Power Co. has repairs to make to Otis Reservoir dam. These cannot be made until later when the snow and ice are gone. The club and residents around the reservoir are regeful that there will be plenty of water for fishing and boating by June 1.

By OSWAI "When in doul

JUNIOR EDITORS

THE JUNIOR CIRCUS - 6

Mitzi on the Trapeze

Mitzi is the star of the flying trapeze in our Junior Circus. She began working on the trapeze when she was very young and now she is very skillful.

For the last of your circus cutouts, color the picture and paste R on cardboard. Now cut out the parts with care, and punch holes with a pencil Now cut out the parts with care, and punch noise with a pents point in the ends of the two cross bars. Bring a thread down through the left end of the top bar, through the left end of the bottom bar, across to the right end of the bottom bar, through that and up again to the right end of the top bar. Leave the ends, so they can be lied into a loop and the trapeze can be hung up.

Cut through the dark black line around Mitzi's fingers and across her traiters. They way can slip the threads behind these tabs.

her insteps. Then you can slip the threads behind these tabs, as shown in the close-up sketches.

Mitzi can stand up on the trapeze with one foot braced against the rope, and she can hang by her hands from the lower bar. Perhaps you can even make her hang by one foot from the lower bar. Try it. Now you have your complete circus and can get it all set up.

(This idea was first submitted by Sharon Schumm, Rockford, Ohlo. Junior Editors award \$10 for usable ideas, so send in yours care of this newspaper. Violet Moore Higgins; AP Newsfeatures) 4-21
